

Project Design Phase-II
Data Flow Diagram & User Stories

Date	18 February 2026
Team ID	LTVIP2026TMIDS81316
Project Name	TransLingua:AI-Powered Multi- Language Translator
Maximum Marks	4 Marks

Data Flow Diagram:

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Web Application)	Text Input	USN-1	As a user, I can enter text that I want to translate.	The system accepts text input and displays it in the input box	High	Sprint-1
Customer (Web Application)	Select Languages	USN-2	As a user, I can select source and target languages.	User can choose languages from dropdown list. System validates selection before translation.	High	Sprint-1
Customer (Web Application)	Language Detection	USN-3	As a user, I can auto-detect the source language.	System automatically detects the language of entered text. Detected language is displayed clearly.	High	Sprint-2
Customer (Web Application)	Translation Processing	USN-4	As a user, I can click translate and receive translated text.	System sends request to Gemini API. Translated output is displayed correctly.	Medium	Sprint-2
Customer (Web Application)	Language Swap	USN-5	As a user, I can swap source and target languages.	Clicking swap button exchanges selected languages instantly. Text fields update accordingly.	High	Sprint-3
